| | Oregon Revised | Oregon | Criterion/Standard | ARAR Compliance |
|-----------|---|--|--|---|
| | Statute | Administrative Rule | | |
| ARAR 1 | Oregon Environmental Cleanup Law ORS 465.200 et seq. | Oregon Hazardous Substance Remedial Action Rules OAR 340-122 et seq. | Sets standards for degree of cleanup required, including for oil and other petroleum products/wastes. Establishes acceptable risk levels for human health at 1x10 ⁻⁶ for individual carcinogens, 1x10 ⁻⁵ for multiple carcinogens, and Hazard Index of 1 for non-carcinogens; and protection of ecological receptors at the individual level for threatened or endangered species and the population level for all others. OAR 340-122-0040 and 0115. | Chemical-specific: a risk-based numerical value that, when applied to site-specific conditions, will establish concentrations of hazardous substances that may remain or be managed on-site in a manner avoiding unacceptable risk. |
| | | | For hot spots of contamination in water, requires treatment, if feasible, to concentrations avoiding significant adverse impact to beneficial uses. OAR 340-122-0090(4), -0085(5). | Action-specific: technology-based requirements for remediation of hazardous substances posing elevated risk. |
| | | | For hot spots contamination of sediments, requires, if feasible, treatment or excavation and off-site disposal of hazardous substances so that remaining concentrations do not exceed specified levels. OAR 340-122-0090(4), -0085. | Action-specific: technology-based requirements for remediation of hazardous substances posing elevated risk. |
| | | | Determination of the current or reasonably likely future land uses or beneficial uses of water shall be considered in selecting or approving removal or remedial actions. OAR 340-122-0030(6) and -0085(6). | Action-specific: both the risk assessment and feasibility study must consider the current and reasonably likely future land and water uses. |
| ARAR 2 | Oregon Hazardous Waste Management Act ORS 466.005 <u>et seq</u> . | Hazardous Waste Management Rules OAR 340-100 et seq. | Establishes a regulatory structure for the generation, transportation, treatment, storage, and disposal of hazardous waste. Incorporates RCRA Subtitle C, which DEQ is authorized to administer and enforce in Oregon. | Chemical- and Action-specific: specifies requirements if remedial action will involve on-site treatment, disposal, or storage of RCRA-listed or characteristic hazardous waste. (Note: off-site treatment, storage, or disposal subject to all administrative and substantive state requirements.) |
| | | Identification and Listing of Hazardous Waste OAR 340-101 <u>et seq</u> . | Identifies additional residuals that are subject to regulation as hazardous waste under state law OAR 340-101-0033. | Chemical- and Action-specific: specifies requirements if remedial action will involve on-site treatment, disposal, or storage of additional listed wastes. |

| ARAR 3 | Oregon Solid Waste Management ORS 459.005 et seq. | Solid Waste: General Provisions OAR 340-093 <u>et seq</u> . | Requirements for the location, design, construction, operation, and closure of solid waste management facilities. | Action-specific: applicable if upland facility contemplated on-site for solid, non-hazardous, waste disposal, handling, treatment, or transfer. (Note: off-site transfer, treatment, handling, or disposal subject to all administrative and substantive state requirements.) |
|-----------|--|---|---|---|
| | | Solid Waste: Land Disposal Sites Other than Municipal Solid Waste Landfills OAR 340-095 et seq. | Requirements for the management of solid wastes at land disposal sites other than municipal solid waste landfills. | Action-specific: applicable to the on-site management and disposal of contaminated sediment, soil, and/or groundwater. |
| ARAR 4 | Water Pollution Control Act ORS 468B.005 <u>et seq</u> . | Water Quality Standards OAR 340-041 <u>et seq</u> . | DEQ is authorized to administer and enforce CWA program in Oregon. DEQ rules designate beneficial uses for water bodies and narrative and numeric water quality criteria necessary to protect those uses. OAR 340-041-0340 designates and defines the beneficial uses that shall be protected in the Willamette Basin. For the purposes of state law, Table 20 are the applicable criteria, unless there is a corresponding criterion under Table 33A, in which case Table 33A is applicable. | Chemical- and action-specific: applicable to any discharges to surface water from shallow groundwater, overland flow of stormwater, dredge and fill, de-watering sediments, and other remedial activities. |
| | | Regulations Pertaining to NPDES Discharges OAR 340-045 et seq. | Effluent limitations and management practices for point-source discharges into waters of the state (otherwise subject to NPDES permit but for on-site permit exemption). | Chemical- and Action-specific: applies state water quality standards and effluent limitations to point-source discharges to the Willamette River. |
| | | Certification of Compliance with Water Quality Requirements and Standards OAR 340-048 et seq. | DEQ assurance that federally-permitted discharge to waters of the state will meet water quality standards (otherwise subject to 401 certification, but for on-site exemption of federal permits, e.g., 404 permit). | 401 certification not an ARAR but an administrative vehicle for applying state water quality standards where federal permit is required, At this site, substantive requirements of water quality standards applicable to remedial action dredge and fill activities. |

| ARAR 5 | Oregon Removal of Material: Filling ORS 196.795 et seq. | Rules Governing the Issuance and Enforcement of Removal-Fill Authorizations within Waters of Oregon Including Wetlands OAR 141-085 et seq. | Substantive requirements for dredge and fill activities in waters of the state. | Action-specific: applicable to remedial action dredge and fill activities, capping, and riverbank remediation. |
|-----------|--|--|---|--|
| ARAR 6 | Oregon Submerged and Submersible Lands ORS 274 and 273 et seq. | Rules for Leasing, Licensing, Permitting and Registration of Structures on, and uses of, State-owned Submerged and Submersible Lands; Rules for granting easement and authorizing special uses. OAR 141-082, 141- 122, and 141-125 et seq. | Establishes requirements for proprietary permission necessary for remedial activities (not subject to onsite permit exemption | Action-specific: applicable to remedial action dredge and fill activities, capping, and riverbank remediation. Access, leases, and easements necessary for investigation or remedial action on state-owned beds and banks should be obtained under this statute. |
| | | Rules for Authorizing Leases and Licenses for the Removal of Rock, Sand, Gravel, and Silt Derived from State-owned Submerged and Submersible Land OAR 141-014 et seq. | Governs the granting of leases and licenses for the removal or use of rock, sand, gravel, or silt derived from state-owned submerged or submersible lands | Action-specific: applicable to remedial action dredge and fill activities, capping and riverbank remediation. |
| ARAR 7 | Removal-Fill in Oregon Essential Indigenous Anadromous Salmonid Habitat ORS 196.810 (1)(b) | Oregon Essential Indigenous Anadromous Salmonid Habitat (ESH) OAR 141-102 | Requirements for the removal-fill in designated salmonid habitat. | Location- and Action-specific: applicable to remedial actions. |

| Control ORS 468A et seq. Standards OAR 340-226 et seq. Fugitive Emission Requirements OAR 340-208 et seq. Prohibits any handling, transporting, or storage of materials, or use of arod, or any equipment to be operated, without taking reasonable precautions to prevent particulate matter from becoming airborne. These rules for "special control areas" or other areas where fugitive emissions may cause nuisance and control measures are practicable. ARARR Protected Objects ORS 97.740-760 ARARA Archaeological Sites and Objects ORS 98.05 et seq. and ORS 390.235 et seq. and ORS 39 | | | | | |
